a list, 500 filled by whigs. Only think of that. And some of them have been in office till they have grown grey and rich from the flesh pots of the Treasury. It is time now that these greasy customers should be turned away, and that leaner men should have a chance to sop their dry biscuit in the rich gravy of the administration. They don't ask any of the meat—just a little of the gravy. And they ought to have it, and they will have it, it they are only a little patient. The removals to be made require deliberation and examination, as well as inexorable promptitude and decision.

Bersen, of Brooklyn, was sanguine of the appointment to Havana, but left a day or two since satisfied that it was all day with him, and that Campbell would be retained.

Tom Lloyd left this city yesterdry afternoon with his sorrel horse, and his certificate of discharge from the Surveyorship of Baltimore. It was a bad idea, that of thinking to secure his office by such an act of open bribery and corruption. Tom ought to have been ashamed of himself, and doubtless he is; and as some atonement for his attern to blarney Capt. Polk, we would advise Tom to ache that sorrel horse aforesaid to Capt. Tyler, as a trifling remuneration for his appointment. Captain Tyler we think will accept, if the history of the horse is kept a secret.

"A horse—a borse—my office for a horse."

"A horse—a horse—my office for a horse." "A horse—a horse—my office for a horse."

Hon. Geo. Sykes, of N. J., it is currently reported this morning, supercedes the whig commissioner of the public buildings, Major Noland. Last math Sengstack, a sign painter of this city, was said to be the man. But we incline to think it is Sykes, and not Sengstack.

Next week it is expected the work of removals will be started by Cave Johnson, after the fashion of Frank Granger, at the rate of 80 or 90 per day. The other departments to follow suit.

of Frank Granger, at the rate of 80 or 90 per day. The other departments to follow suit.

Wickliffe, late P. M. G., thinks it quite probable, since his discharge, that the administration will fall through. He had no idea after giving those expensive parties of the last winter, that his services could be dispensed with. But, positively, we are not sorry for him; and the idea that under any terms there was the shadow of a prospect for his retention, was most absurd. Yet Wickliffe had such an idea—an idea only excusable in a Millerite.

We are requested to noutly Pat M'Guire, that if he wishes to displace old Misjor Dade from the superintendence of the District Penitentiary, he must get up earlier in the morning, or other men will be in before him.

Captain Rice.

Washington, March 23s, 1845. Office seekers begin to get a little scarce in Washington. It is found that a man with fair recommendations stands about as good a chance absent as present

I am of the opinion that the question of what paper in Washington shall be the Government organ, still remains undecided. Blair& Rives are using great exertions to secure that position for the Globe; but whether they will succeed remains to be seen. The point to be determined first, is, whether any of the existing papers shall be selected, or a new adminis-tration paper be commenced. The latter could be readily done, if agreed upon.

The Globe men have already grown rich, and if they become the Government organ, they may in addition thereto get the printing of both houses of Congress and become much richer, by which means their vast power might be wielded for evil

means their vast power might be wielded for evil as well as for good. Under such circumstances, at least two democratic papers are required in Washington. How the matter will be finally arranged I cannot tell.

Mr. Bancreft left the city yesterday for Boston. He has gone home for his wile and family.

Some important points will grow up, when we come to arrange and settle our boundary between Texas and Mexico. In bringing Texas in, we presume we do so to the full extent of her boundaries as they existed when she formed a part of our purchase of Louisiana. What were then her boundaries? It, is said that the French Bishopric of Louisiana extended west from Texas and Louisiana to the Pacific ocean. The commissioners on the part of the United States, who negociated the purchase of Louisiana, which probably yet exists in some of the libraries of Paris, which, although probably imperfect in some respects, it nevertheless must have given some outline of the vast country embraced within the province of French Louisiana.

Gen. Lamar, acting on such light and proofs as he

rry embraced within the province of French Louisiana.

Gen. Lamar, acting on such light and proofs as he had, in his inaugural address, delivered when first elected President of the Republic, claimed that Texas extended west through Upper California, to the Pacific ocean.

When Texas submitted a proposition to the English Government to form a commercial treaty, this extensive boundary claimed on the part of Texas, was noted by the British Minister, who called the attention of the Texas Minister to the subject, to which the latter replied in the affirmative, stating he had no authority to abridge any lines of boundary claimed by the Republic, and that if England acknowledged the Independence of Texas, it must be with the full knowledge of the boundaries claimed and set forth in President Lamar's Inaugural. England did go on and acknowledge the Independence of Texas, and in doing so, virtually acknowledged the boundary of Texas to extend west to the Pacific ocean. When Texas becomes the territory of the United States, will we not have the right to claim Texas to the full extent of her asserted and acknowledged boundaries? We think so.

Yours, very truly. Yours, very truly.

P. S.—The reason I stated Mayor Morris had left was, that I had it from his own lips that he intended leaving on the very day on which I wrote the letter. It seems he changed his mind and still remains in the city, I believe.

Yours &c. R.

Philadelphia. [Correspondence of the Hereld.] PHILADELPHIA, March 24, 1845

In speaking on Saturday of the gains by the democrats in the election, I am made to say that they had carried two thirds of the city. This is an error of some magni tude-for if such had been the case, it would have been democratic victory such as that party never before had. Instead of "two-thirds," I wrote that they had carried two "wards" of the city. Something of a difference, I apprehend. Again, in my statement of the native majority in Southwark, I inadvertently omitted the words, "over both parties;" for the majority of the faction over the democrats alone is 1150, or thereabouts; and their ma-jority over both is as I set it down, about 900. The rest jority over both is as I set it down, about 900. The rest of my statement is correct. The natives themselves make the most of their victory in Southwark, and, indeed, the result shows that it has firm hold of that disorderly and misguided district; but I believe that, even there, their triumph will be of short duration. The whole force of the people were not out, and, in several instances, whigs, who had taken a stand against nativeism, in hopes of electing their candidates in consequence of the weakening of the democracy, abandoued their tickets, when they found that they cound not succeed, and went for those of the faction. This gave the natives a fictitious strength, which will be dissipated when general and more important offices are at stake, and the whig leaders shall have succeeded in re establishing something like a better organization in the whig ranks.

The principal places of amusement are now the National Circus, General Welsh; the Arch Street Theatre, Mr. Burton; the Chesnut Street Theatre, Mr. Weymes, with Palmo's Ethiopian Opera; and the Walnut Street, Mr Marshall. Weich's novelties continue to draw crowded houses. The Chesnut Street opened to a crowded house, with the burlesque opers of Sam-Om-Ole-Bull, (La Somannoula,) on Saturday night, and the house was unit to over-flowing. These things may please the people for a while, but they soon get tired of them. We are all delighted with a witty come song on the first, second, or perhaps third hearing, but I have heard but few that will be are all other novelties at the same time, with an excellent company, and to a crowded house. The indications are that this theatre will be popular, which is owing to the merit of the company and the good arrangements of the manager. of my statement is correct. The natives themselves make

Dr. Cooper—Sir :—Last fully I contracted a certain private disease, and tramediately applied to a doctor, who premised to cure me in a week. I continued with him two months, but was gradually setting worse; I tried one after another, all the advertising doctors, and each one promised positively to cure in the next discovered the object of these men was money, and that they were not doctors. I concluded to go into the hospital, where the doctors kept me under a course of mercury for eight weeks; my throat and nose were ulcerated, pains in all my joints, and my body covered with ulcers. I was a complete skeleton; the doctors considered it dangerous to give me any more medicine, and advised a southern climate. I lief the hospital, and by advice of several friends, placed myself ander your care on the first of January lant. I am now well saw satored to perfect health. I wish this published.

UNIVERSAL COMMENDATION.—From every city, Utown and village where Dr. Upham's YEGETABLE PILE ELECTUARY has been introduced, the most graillying instelligence of its excellent effects have been received by the proprietor. In hundreds of instances it has triumphed over cases which were deemed incurable.

READ THE FOLLOWING REMARKABLE CASES. A gentleman from Brooklya, Long Island, after using two boxes of the Electuary, gave me the following account:—When I obtained the medicine I was suffering severely from an attack of the Piles, and for two months had been afflieted with severe headache, accompanied by a distressing sensition at the stomach. There was a perspiration about the head, but the body, legs and arms were always dry and hunky. The medicine removed the Piles, cared the headache and distress at the stomach, and created a natural perspiration over the whole body, and I am now in batter health than I have been for years.

SECRET HABITS — Dr. Benjamin Bell, superintendent of the Asylum at Charlestown, in alluding to the subject of this, says "there is four plagre in our midet, cutting off amongst the voung, the beautiful, and the promising of our land." Respecting the habit above alluded to, if these who indulge in this dellasive and desolating habit, could be made sensible of the half, or even a tithe of the evils to which they are reshing with such leastful creatainty, how many, very many, that are now wasting consumptives, would otherwise bear the impress of pure health and manly vigor.

Dr. Gregory, 56 Gold street, has devoted much time and study to this subject. The Doctor now devote his whole attention to the treatment of that class of maladies called private, which also includes those resulting from secret historia-dia restion—palpitation of the heart—tembling of the kunds—directions, or pain of the head—great nervous, or general cludity of budy—great weakness, or impairment of memory—conflusion of the intellect, &c. These are a few of the ills arising from this hedious practice; but they are those which may be relieved by the use of Dr. Gregory's lavigorating Tonic Cordial. It is a remedy that may be implicitly relied on in all cases of the for going; as also great genital debility, or coldness of the organs procreation. Price 32 per bottle, or in cases of half dozon for 310; and may be sent to any part of the country.

Dr. Gregory is at home, and may be consulted at all'hours of the day or evening All intervews prefectly confidential.

Letters must be post paid, and addressed to the Doctor's residence, as above.

DOUTOR LAMER' is still considentially consulted, at his old office, 63 field street, between Fullon and Beskman, on all diseases of a delicate nature, its treatment being will and indictions, requires neither mercury, restraint in day, or himane from business pursuits. Recent cases cured in 3 or 4 drance from business pursuits. Recent cases cured in 3 or 4 days.

DEBILITY, NERVOUS OR CONSTITUTIONAL, arising from a too frequent indulgence of the passions of induscreet youth, and thereby causing nightly emissions, and eventually confirmed impotency, engage the Dr.'s strictest attention, his object being to restor the system, mentally and bodily, to that state of vigor nature originally designed.

STRICTURES, a disease fraguently existing without the patient being the least aware, sometimes caused by mal-treatment of numitated medical presenders, and sometimes by the neglect of the parties themselves, are, by the Dr. afterwally cured, without pain or inconvenience.

The Doctor being one of the few qualified advertising Surgeons in the city, guarantees a prefect cure, or no obsure made, Letters, post-paid, enclosing a fee, immediately attended to, and medicine, with advice, each to any pert of the United States.
